The Rand-McNally List of Selections in School Readers 1896

christine m korsgaard presents a compelling new view of humans moral relationships to the other animals she defends the claim that we are obligated to treat all sentient beings as what kant called ends in themselves drawing on a theory of the good derived from aristotle she offers an explanation of why animals are the sorts of beings for whom things can be good or bad she then turns to kant s argument for the value of humanity to show that rationality commits us to claiming the standing of ends in ourselves in two senses kant argued that as autonomous beings we claim to be ends in ourselves when we claim the standing to make laws for ourselves and each other korsgaard argues that as beings who have a good we also claim to be ends in ourselves when we take the things that are good for us to be good absolutely and so worthy of pursuit the first claim commits us to joining with other autonomous beings in relations of moral reciprocity the second claim commits us to treating the good of every sentient creature as something of absolute importance korsgaard argues that human beings are not more important than the other animals that our moral nature does not make us superior to the other animals and that our unique capacities do not make us better off than the other animals she criticizes the marginal cases argument and advances a new view of moral standing as attaching to the atemporal subjects of lives she criticizes kant s own view that our duties to animals are indirect and offers a non utilitarian account of the relation between pleasure and the good she also addresses a number of directly practical questions whether we have the right to eat animals experiment on them make them work for us and fight in our wars and keep them as pets and how to understand the wrong that we do when we cause a species to go extinct

a surprising and insightful work rediscovering reverence offers a rational explanation of what the modern western world calls religion and argues that it is not what most people assume questioning western culture s evolving use of the word religion over the last five centuries ralph heintzman strips away misunderstandings to demonstrate that faith is not the same as belief he shows how faith is not something one has but something one does leading the reader to a deeper understanding of religious practice and its necessary place in human life drawing on familiar experiences as well as aspects of western and eastern spiritual traditions heintzman argues that religious practice is rooted in two basic ways human beings act in the world it is therefore an element in the structure of the human spirit not a phase in its history explaining the meaning of religious practice in contemporary language rediscovering reverence is addressed to anyone who wants to explore the meaning and promise of a religious life a unique and thoughtful meditation on the role of reverence in everyday life rediscovering reverence presents new perspectives on modern faith religion and both personal and societal well being

g w f hegel and friedrich nietzsche are often considered the philosophical antipodes of the nineteenth century in infinite autonomy jeffrey church draws on the thinking of both hegel and nietzsche to assess the modern western defense of individuality to consider whether we were right to reject the ancient model of community above the individual the theoretical and practical implications of this project are important because the proper defense of the individual allows for the survival of modern liberal institutions in the face of non western critics who value communal goals at the expense of individual rights by drawing from hegelian and nietzschean ideas of autonomy church finds a third way for the individual what he calls the historical individual which goes beyond the disagreements of the ancients and the moderns while nonetheless incorporating their distinctive contributions

with quiet eloquence lane sunderland argues that we must reclaim the fundamental principles of the constitution if we are to restore democratic government to its proper role in american life for far too long he contends the popular will has been held in check by an overly powerful supreme court using non constitutional principles to make policy and promote its own political agendas his work shows why this has diminished american democracy and what we can do to revive it sunderland presents a strong thoughtful challenge to the constitutional theories promoted by ronald dworkin archibald cox richard epstein michael perry john hart ely robert bork philip kurland laurence tribe mark tushnet and catharine mackinnon an enormously diverse group united by an apparent belief in judicial supremacy their theories he demonstrates undermine the democratic foundations of the constitution and the power of the majority to resolve for itself important questions of justice central to this enterprise is sunderland s reconsideration of the federalist as the first most reliable and most profound commentary on the constitution the federalist he states is crucial because it explains the underlying theory of the constitution as a whole a theory that gives meaning to its particular provisions in addition sunderland reexamines the declaration of independence and the work of hobbes locke and montesquieu in order to better define the nature and limits of their influence on the framers his reading of these works in conjunction with the federalist shows just how far afield contemporary commentators have strayed sunderland deliberately echoes and amplifies madison s wisdom in federalist no 10 that the object of the constitution is to secure the public good and private rights and at the same time to preserve the spirit and form of popular government to attain that object he persuasively argues requires that the judiciary acknowledge and enforce the constitutional limitations upon its own powers in an era loudly proclaiming the return of popular government majority rule and the will of the people that argument is especially relevant and appealing
