Timecode A User's Guide

1999-04-23

apart from the procedural information that describes how a device should be operated instructions for use include different types of declarative information such as information about the internal working of the device system information and information about the circumstances in which the different functions can be used utilization information in this study the use and the effects of system and utilization information are investigated in a number of experiments the results demonstrate that users spend a considerable amount of time on reading each information type however contrary to common belief system information has only limited effects utilization information does not affect task performance at all moreover users of instructions without declarative information are more confident in their ability to learn to work with the device and consider the learning process less difficult than users of instructions with declarative information these results suggest that users of instructions without system and utilization information are capable to use other information sources such as the procedural information and the interface of the device to derive the required declarative knowledge

VCR Owner Guide to the Movies

1999-12-01

this innovative guide brings together practical solutions to the documentation challenges faced by today s organizations from company policies and desk instructions to baldrige and the iso 9000 requirements it applies a customer and quality based systems approach to streamlining and managing your documentation system this second edition is an organized toolbox of powerful methodology and metrics that shows companies how to steer clear of cumbersome and obsolete documentation and gives numerous examples of the tremendous opportunities and pitfalls presented by technology such as the internet and web based documentation management software the society for technical communication stc awarded this book the touchstone 2001 award
