Voice and Articulation

1940

excerpt from how to speak exercises in voice culture and articulation most of the excellent books on

voice culture which have been published deal with the subject from the viewpoint of the singer our aim is to improve the speaking voice therefore the emphasis is put on that side of the matter in all the discussions and exercises relating to articulation work the necessity for the right mental attitude of the speaker toward his audience has been stressed the obligation to make himself heard and a real sympathy with the audience should be felt by everyone whether he is speaking in a large hall a schoolroom or a drawing room and the majority of teachers recognize the importance of combining this feeling of responsibility with the mechanical drills the foundation for the work outlined here is built mainly upon the technical courses at Emerson College of Oratory in Boston and the writer's experience in platform reading and teaching in grade work as well as in teachers college classes has proved the value of the practice involved this book has been written in response to the request of many teachers in the public schools for a definite outline of work to develop the correct use of the voice and distinct articulation it shows the logical order of the drills used every day in the public speaking classroom at the Rhode Island College of Education about the publisher Forgotten Books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Speech Steps

2002-01-01

the first edition of this book has enjoyed a gratifying existence it was first published in 1965 it found its intended place as a research reference and as a graduate level text research laboratories and universities reported broad use published reviews some twenty five in number were universally kind subsequently the book was translated and published in Russian by Svyaz Moscow 1968 and Spanish by Gredos S.A. Madrid 1972 copies of the first edition have been exhausted for several years but demand for the material continues at the behest of the publisher and with the encouragement of numerous colleagues a second edition was begun in 1970 the aim was to retain the original format but to expand the content especially in the areas of digital communications and computer techniques for speech signal

processing as before the intended audience is the graduate level engineer and physicist but the psycho physicist phonetician speech scientist and linguist should find material of interest
