migration has become a top priority for politicians and policy makers around the world but most writing on the topic covers only half the issue wrongly assuming that migration policy equals immigration policy where in reality the majority of states

care more deeply about emigration and the transnational involvements of emigrants and their descendants in the diaspora liberal democratic states have long considered emigration controls off limits for fear that they violate individual freedom of exit at the same time as interfering in the domestic affairs of other states but these norms are changing fast in the past 25 years more than half of all united nations member states have established some form of government department devoted to their people living in other countries what explains the rise of these diaspora institutions and how does it relate to the political geographies of decolonisation regional integration and global governance since world war ii this book addresses these questions based on quantitative data covering all un members from 1936 2015 and fieldwork with high level policy makers across 60 states the book shows how in many world regions the unregulated spread of diaspora institutions is unleashing a wave of human geopolitics a kind of geopolitics involving claims over people rather than territory it argues for the development of principles to guide the future development of state diaspora relations in an era of unprecedented global interdependence

the conflict in ukraine and russia s annexation of crimea has undoubtedly been a pivotal moment for policy makers and military planners in europe and beyond many analysts see an unexpected character in the conflict and expect negative reverberations and

a long lasting period of turbulence and uncertainty the de legitimization of international institutions and a declining role for global norms and rules did these events bring substantial correctives and modifications to the extant conceptualization of international relations does the conflict significantly alter previous assumptions and foster a new academic vocabulary or does it confirm the validity of well established schools of thought in international relations has the crisis in ukraine confirmed the vitality and academic vigour of conventional concepts these questions are the starting points for this book covering conceptualisations from rationalist to reflectivist and from quantitative to qualitative most contributors agree that many of the old concepts such as multi polarity spheres of influence sovereignty or even containment are still cognitively valid yet believe the eruption of the crisis means that they are now used in different contexts and thus infused with different meanings it is these multiple conceptual languages that the volume puts at the centre of its analysis this text will be of great interest to students and scholars studying international relations politics and russian and ukrainian studies

news fixers are locally based media employees who serve as translators coordinators and guides to foreign journalists in unfamiliar terrain operating in the shadows fixers contributions to journalism are largely hidden from us yet they underpin the entire international news industry almost every international news story we read today could not be produced without a fixer indeed without fixers on the ground skill and intimate knowledge of a territory journalists would struggle to document stories unfolding in countries outside their own despite this however fixers remain one of the most under protected and undervalued groups contributing to the production of news targeted by militant groups and governments even by their neighbors they must often engage in a precarious balancing act bridging the divides between foreign journalists and the people who live and work in fixers own communities in this book lindsay palmer reveals the lives and struggle of those performing some of the most important work in international news drawing on interviews with 75 fixers around the world palmer is the first researcher to illuminate fixers own rich narratives offering a glimpse of how difficult it is to play the role of cultural mediator both in and out of conflict zones a news fixer is not simply administrative rather the fixer s engagement with the story is editorial and more importantly cultural each task that a fixer takes on is a creative effort at mediating between different lived experiences of race ethnicity gender sexuality religion politics community and nation ultimately the fixer offers a different picture of international reporting than most people are accustomed to seeing one that is more collaborative more contested and more fluid in its understanding of truth in a global cross cultural context
