The Russian Cold 2021-08-01 cold has long been a fixture of russian identity both within and beyond the borders of russia and the soviet union even as the ongoing effects of climate change complicate its meaning and cultural salience the russian cold assembles fascinating new contributions from a variety of scholarly traditions offering new perspectives on how to understand this mainstay of russian culture and history in chapters encompassing such diverse topics as polar exploration the eastern front in world war ii and the iconography of hockey it explores the multiplicity and ambiguity of cold in the russian context and demonstrates the value of environmental historical research for enriching national and imperial histories

A Year Since the Return of History: A New Cold War 2023-03-01 the last one year proved itself to be a very tough year and it brought many new challenges for the international relations among these new challenges the most striking one is probably the russia s unleashing a war of aggression on ukraine as russia s invasion stepped up on the 24 february 2022 many western experts and policymakers predicted that the ukrainian armed forces wouldn t be able to defend kyiv and that it would fall to the invaders before the month ended nonetheless the government and people of ukraine are still fighting and you can see evidence of this everywhere you walk in kyiv thanks to the flag of free ukraine flying from rooftops it is clear that we are entering a new era in international relations one that has revived the horrors and catastrophes of the past and paved the way for the return of history regardless of the outcome of the conflict in ukraine now that a full year has passed since the beginning of the attack tpq has devoted this issue to exploring the implications of the russian invasion of ukraine on many spheres ranging from energy security to agriculture at the same time we are raising the question of whether the current era deserves to be classified as the new cold war if so who are the competing parties and in what ways is this new cold war differs from the one that ended in 1991 with the united states and the

liberal world emerging victorious to come up with sufficient and informative answers for these critical questions we assembled a large number of extremely valuable articles written by eminent researchers policymakers journalists and young experts all around the world from the united states to russia and from türkiye to sweden manuscripts came in from our contributors hence it is with great pleasure that we provide you with this very qualified issue which investigates several facets of the emerging global order from an international perspective professor richard sakwa investigates the causes of the resurgence of the cold war and examines the differences between it with the original confrontation he thinks the cold war mentality is once again ruling world relations these arguments suggest that the hope that the conclusion of the cold war in 1989 would usher in a more universal and permanent peace has largely been disproved instead by 2014 the centennial of the beginning of world war i europe was once again in the grips of bloody war the united states and the rest of the political west as it had been reshaped by the cold war remained on one side on the other hand he claims that a considerably diminished russia has replaced the defunct soviet union and that this is happening alongside a china that is determined to regain its great power position professor li bennich björkman argues that russia is using bombings attacks and cruelty to obliterate ukraine s history as a result she sees the current conflict as a struggle to maintain the recollection of what a peaceful ukraine looked like smelt like tasted like and felt like she contends that a split between russia and ukraine is inconceivable for putin because of ukraine s strategic importance to russia ukrainian president leonid kravchuk understood this as early as 1991 she says that he and other ukrainian leaders sought to defend ukrainian territory while assuring moscow that amicable ties remained a possibility russia she complains has never undergone a comparable transformation professor ziya öniş who believes that we are in the midst of a neo cold war focuses more on the conflict between the west and the rest he claims that the clash between democratic and authoritarian capitalism the defining conflict of the new era was exacerbated by russia s invasion of ukraine according to him the concerted effort of western nations to end the conflict was evidence of the resurgence of the democratic club of western governments and their allies g7 plus he also argues that a significant schism in opinion has developed between the west and the rest as a direct result of the war he claims that the russian war in ukraine ushers in a new era in the post western world one in which territorial conquests are accepted as the norm setting the path for more armed clashes in a globe already riven by war professor nicolai n petro maintains that the healing of the ukrainian people is often forgotten among the numerous conflicting narratives that drive the war in ukraine he argues that this is because the west is ignoring the other ukraine whose dissatisfaction with the actions of the ukrainian government since 2014 has stoked tensions according to him the west s reaction to russia s incursion has focused on punishing moscow but hasn t done anything to ease the tensions within ukraine his work indicates that permanent societal harmony in ukraine and peace in europe can be achieved only via reconciliation inside ukraine we encourage you to learn more about a year since the return of history a new cold war on behalf of transatlantic policy quarterly i would like to express my gratitude to all the contributors who committed a significant amount of effort and work the tpq team has had a great time putting together this

The First Cold Warrior 2006-05-26 from the moment he took the oath of office in april 1945 harry truman was required to make difficult decisions in an increasingly dangerous world the results notably the truman doctrine the marshall plan and the north atlantic treaty organization were the building blocks of containment a strategic approach usually associated with george f kennan in this fresh account based on primary sources elizabeth edwards spalding argues that it was truman himself shaped by history experience and religious faith who outlined and directed america s practice of containment in so doing he established a new liberal internationalism that became the dominant bipartisan consensus on u s foreign policy in the post world war ii era

Shadow Cold War 2015-10-15 the conflict between the united states and the soviet union during the cold war has long been understood in a global context but jeremy friedman s shadow cold war delves deeper into the era to examine the competition between the soviet union and the people s republic of china for the leadership of the world revolution when a world of newly independent states emerged from decolonization desperately poor and politically disorganized moscow and beijing turned their focus to attracting these new entities setting the stage for sino soviet competition based on archival research from ten countries including new materials from russia and china many no longer accessible to researchers this book examines how china sought to mobilize asia africa and latin america to seize the revolutionary mantle from the soviet union the soviet union adapted to win it back transforming the nature of socialist revolution in the process this groundbreaking book is the first to explore the significance of this second cold war that china and the soviet union fought in the shadow of the capitalist communist clash

CEO's Sweet Love For Cold Substitute Wife 2020-10-31 an essential dimension of the cold war took place in the realm of ideas and culture while much work exists on cinema relatively little research has been conducted on this subject in relation to television despite the latter being a technology and popular cultural form that emerged during this period this book rectifies that absence by examining the impact of the cold war on entertainment television and underlines the comparative aspect by studying programs from both blocs without forgetting of course the outsize impact of american television although most of the focus is on the two main protagonists the us and the ussr chapters also consider programming from the uk czechoslovakia romania and both east and west germany this book represents a contribution to the debate about the cultural cold war through a rigorously comparative analysis of the two blocs for this reason the approach used is thematic the study begins by considering the subject of censorship and then goes on to look at the very particular case of the two germans a series of comparative genre studies follow including police and war variety shows and documentaries and docudramas perhaps surprisingly the similarities are often greater than the differences between television in the two blocs
