## **Party Organisation and Administration 1976**

pradeep chhibber and ken kollman rely on historical data spanning back to the eighteenth century from canada great britain india and the united states to revise our understanding of why a country s party system consists of national or regional parties they demonstrate that the party systems in these four countries have been shaped by the authority granted to different levels of government departing from the conventional focus on social divisions or electoral rules in determining whether a party system will consist of national or regional parties they argue instead that national party systems emerge when economic and political power resides with the national government regional parties thrive when authority in a nation state rests with provincial or state governments the success of political parties therefore depends on which level of government voters credit for policy outcomes national political parties win votes during periods when political and economic authority rests with the national government and lose votes to regional and provincial parties when political or economic

authority gravitates to lower levels of government this is the first book to establish a link between federalism and the formation of national or regional party systems in a comparative context it places contemporary party politics in the four examined countries in historical and comparative perspectives and provides a compelling account of long term changes in these countries for example the authors discover a surprising level of voting for minor parties in the united states before the 1930s this calls into question the widespread notion that the united states has always had a two party system in fact only recently has the two party system become predominant

political parties formed the cornerstone of the liberal democracy for which britain claimed it was fighting in the second world war however that conflict represented the most sustained challenge to the british party system during the twentieth century war forced the suspension of normal electoral politics and exerted considerable extra demands on the time and loyalties of

party activists and organizers this all posed a serious challenge to the conservative labour and liberal parties parties at war uses an unusually broad and deep range of records of the main political parties to explore how they responded to the challenge of war extensive use of the local as well as the national level papers of the major parties offers a fuller picture than ever previously attempted andrew thorpe focuses on what parties actually did at both local and national levels to sustain their organization during the war he assesses the varying impacts of war not just on each of the parties but also over time and between the different regions and areas of britain thorpe demonstrates how wartime struggles over organization had significance not just for the election of the first majority labour government in 1945 but also for the longer term development of party in modern british politics

the functioning of representative democracy crucially depends on political parties that mediate between citizens and the state it is widely doubted however that contemporary parties can still perform this connective role taking seriously the ensuing challenges for representative democracy rethinking party reform advances a normative account of party reform drawing on both democratic theory and political science scholarship on parties moving beyond purely descriptive or causal analytical perspectives on party reform the book clarifies on theoretical grounds why party reform is centrally important for the sustainability of established democracies and what effective party reforms could look like in an age where most citizens look to parties with scepticism and distrust in doing so this book underlines in distinctive fashion why scholars and citizens should care about re inventing and transforming political parties resisting widespread tendencies of either declaring parties unreformable or theorising them out of the picture

party competition in the south has been a subject of perennial interest to political scientists at least since v o key s famous 1949 book on southern politics the fascination stems from the fact that unlike every other region in in the united states for much of its history there has been precious little party competition in the south why parties matter argues that a competitive party system is essential in order to have the public s preferences and wants expressed and satisfied in elections or in other words a competitive party system is necessary for democracy to operate effectively aldrich and griffin focus on the history of political parties electoral competition and effective democratic governance in the south during four historical eras the whig period that preceded the civil war the period after reconstruction the jim crow era and the modern era in each instance they trace how party competition emerges and the conditions under which it can fail or succeed while many scholars have argued that strong parties at the national level are necessary for change at the state or local level the authors bring much evidence to bear showing that it is instead a bottom up candidate centered phenomenon party competition arises when aspiring office holders determine that their prospects for a successful career are greater in what they call a nascent party these candidates first put together a party organization on the local level organizing then moves to the state level and only when the party is solidified at that level will it be able to find sustained success at the national congressional level in the whig period the

legacies of the pre jacksonian era stunted the development of a southern party system but the region was catching up to the north in terms of party competition in the years prior to the collapse of the whig party just before the civil war in the post reconstruction period a nascent two party system was abruptly and dramatically thwarted by the redemption of the south by the white southern democratic party and in the jim crow period competitive politics virtually disappeared in the modern era they find by virtually every measure that the southern party system has caught up to the party system in the north despite the seeming dominance of the republican party in much of the south according to the authors since 1980 the south has progressively become more electorally competitive and as a consequence of these more competitive elections southern elected officials according to the authors have become measurably more responsive to their constituents in their concluding chapter aldrich and griffin evaluate how over time democratic attitudes and behaviors in the south have evolved as compared to the north as the south has acquired a more developed party system and more competitive elections and they also assess the effectiveness of government in the two regions over time
