about 550 registrants from 51 different countries attended the seventh ottawa conference on medical education and assessment in maastricht we received 525 abstracts for the conference divided in thematic poster sessions and platform presentations organising the conference was an honour and we tried to meet the high standards of a friendly and relaxed atmosphere which has characterized previous ottawa conferences during and after the conference about 250 papers were submitted for publication in the conference proceedings leaving us little time for a post conference depression despite the large number of papers the editors have attempted to review and edit the papers as care fully as possible occasionally however correspondence exceeded reasonable deadlines preventing careful editing of a small number of the papers although we felt that our editorial task was not quite finished we nevertheless decided to include these papers we thank the many authors for their enthusiastic and

prompt response to occasionally tedious editorial suggestions and requests we are sure that this collective effort has resulted in a book that will make an important contribution to the field of medical education the editors want to thank jocelyn flippo berger whose expertise with desk top publishing and perseverance was a great help

what is a rubric a rubric is a coherent set of criteria for student work that describes levels of performance quality sounds simple enough right unfortunately rubrics are commonly misunderstood and misused the good news is that when rubrics are created and used correctly they are strong tools that support and enhance classroom instruction and student learning in this comprehensive guide author susan m brookhart identifies two essential components of effective rubrics 1 criteria that relate

to the learning not the tasks that students are being asked to demonstrate and 2 clear descriptions of performance across a continuum of quality she outlines the difference between various kinds of rubrics for example general versus task specific and analytic versus holistic explains when using each type of rubric is appropriate and highlights examples from all grade levels and assorted content areas in addition brookhart addresses common misconceptions about rubrics important differences between rubrics and other assessment tools such as checklists and rating scales and when such alternatives can be useful and how to use rubrics for formative assessment and grading including standards based grading and report card grades intended for educators who are already familiar with rubrics as well as those who are not this book is a complete resource for writing effective rubrics and for choosing wisely from among the many rubrics that are available on the internet and from other sources and it makes the case that rubrics when used appropriately can improve outcomes by helping teachers teach and helping students learn
