the european convention on human rights guarantees freedom of education including the opportunities to create and operate faith based schools however as european societies become more religiously diverse and less religious at the same time the role of faith based schools is increasingly being contested serious tensions have emerged between those who ardently support religious schools in their various forms and those who oppose them given that faith based schools enjoy basic constitutional guarantees in europe the controversy around them often surrounds issues of public financing degrees of organisational and pedagogical autonomy and educational practices and management this volume is about the controversies surrounding religious schools in a number of western european countries the introductory chapter briefly analyses the structural pressures that affect the position of religious schools outlining the relevant institutional arrangements in countries such as denmark germany france ireland the netherlands and scotland the following chapters provide a detailed analysis of the discussions and controversies surrounding faith based schools in each country finally the two concluding chapters aim to provide a bigger comparative picture with regard to these debates about religious education in liberal democratic states and culturally pluralist societies this book was originally published as a special issue of comparative education
