39	The Rise of the American Conservation Movement

The Nature State 2017-07-14 this volume brings together case studies from around the globe including china latin america the philippines namibia india and europe to explore the history of nature conservation in the twentieth century it seeks to highlight the state a central actor in these efforts which is often taken for granted and establishes a novel concept the nature state as a means for exploring the historical formation of that portion of the state dedicated to managing and protecting nature following the industrial revolution and post war exponential increase in human population and consumption conservation in myriad forms has been one particularly visible way in which the government and its agencies have tried to control manage or produce nature for reasons other than raw exploitation using an interdisciplinary approach and including case studies from across the globe this edited collection brings together geographers sociologists anthropologists and historians in order to examine the degree to which sociopolitical regimes facilitate and shape the emergence and development of nature states this innovative work marks an early intervention in the tentative turn towards the state in environmental history and will be of great interest to students and practitioners of environmental history social anthropology and conservation studies

Pioneering in Conservation 1986 this history of the british nature conservation movement describes an organized movement which is now 100 years old the text traces the early campaigns for an end to the millinery industry and for freedom to walk the mountains the legislation for bird protection and access to the countryside the battles against pesticides and pollution farming and forestry and the present concerns with global issues and the presumed greening of governments the book questions governmental concern for the environment and the efficacy of the established conservation bodies the author argues that the purchase of reserves and the saving of remnant populations is not enough the movement must draw itself together in order to address the global issues which it has previously avoided

A History of Nature Conservation in Britain 1992 this book traces the development of scientific conservation and technical art history it takes as its starting point the final years of the nineteenth century which saw the establishment of the first museum laboratory in berlin and ground breaking international conferences on art history and conservation held in pre world war i germany it follows the history of conservation and art history until the 1940s when from

the ruins of world war ii new institutions such as the istituto centrale del restauro emerged which would shape the post war art and conservation world the book will be of interest to scholars working in art history conservation history historiography and history of science and humanities

The American Environment 1968 this 2nd and fully revised edition offers insights into the campaign for countryside access and protection and considers topical concerns afresh it examines unwelcome choices for the future and britain s role in the global conservation debate

Pioneering in Conservation 1961 shortlisted for the 2014 sahg b alice davis hitchcock medallion certainly ancient structures have long been treated with care and reverence in many societies including classical rome and greece but only in modern europe and america in the last two centuries has this care been elaborated and energised into a forceful dynamic ideology a conservation movement infused with a sense of historical destiny and loss that paradoxically shared many of the characteristics of enlightenment modernity miles glendinning s new book authoritatively presents for the first time the entire history of architectural conservation and traces its dramatic fluctuations in ideas and popularity ending by questioning whether its recent international ascendancy can last indefinitely

Histories of Conservation and Art History in Modern Europe 2022-03-14 the first book to provide a full history of the development of architectural conservation a history of architectural conservation is considered a landmark publication by architectural conservation students and professionals the world over twenty years after its first publication this new edition of jukka jokilehto s groundbreaking book continues the story to bring the history of architectural conservation right up to the modern day jokilehto draws on his distinguished career of over 40 years at icrom international centre for the study of the preservation and restoration of cultural property founded by unesco to provide studies from europe the middle east the usa japan india china australia and south america this accessible and well written introduction to the history and theory of architectural conservation is richly illustrated in full colour and will be an essential go to guide for students and practitioners worldwide

A History of Nature Conservation in Britain 2002-11 this book offers a sweeping history of

cultures on ecosystems is particularly striking in the new worlds into which europeans have expanded over the past five hundred years using a comparative and multidisciplinary approach beinart and coates examine this neglected aspect of the history of settler incursion and dominance in two frontier nations the usa and south africa they also seek to explain change in indigenous ideas and practices towards the environment and discuss the rise of popular environmentalism up to the present day

The Drama of Conservation 2015-11-07 ronald j fahl has compiled a milestone reference work one that offers historians and other interested scholars for the first time a reliable and comprehensive access to the widely scattered written materials that reveal the history of forestry forest conservation and forest industry in the united states and canada sponsored by the forest history society and funded in part by a major grant from the national endowment for the humanities this volume covers published scholarly books and writings from many sources containing significant historical matter including lumber trade journals professional forestry journals conservation magazines government publications state and local histories autobiographies and oral history interviews

The Green Republic 2010-06-28 guardians of the parks is the unique story of the national parks and conservation association npca created on the heels of the national park service npca began as a citizens organization to keep watch over the nation s national parks it was charged with the duty of ensuring that the national park service remain true to its original purpose to preserve these wild spaces as virtually the only places where humans could seek and find answers to questions about nature and their relation to it this book chronicles npca s efforts from its founding to the present day john miles has given us an inside narrative a history of strong personalities such as robert sterling yard sigurd olsen anthony wayne smith and paul pritchard all struggling to define their own organization and its goals and also to develop a protected park system for all citizens to enjoy this book tells not only their story their motives and lasting influence but also the story of the national park themselves

Gifford Pinchot with Rod and Reel 1994 publisher description

Environment and History 2002-01-08 a history of architectural conservation expands

knowledge about the conservation of ancient monuments works of art and historic buildings in

includes the origins of the interest in conservation within the european context and the development of the concepts from antiquity and the renaissance to the present day jokilehto illustrates how this development has influenced international collaboration in the protection and conservation of cultural heritage and how it has formed the principal concepts and approach to conservation and restoration in today s multi cultural society this book is based on archival research of original documents and the study of key restoration examples in countries that have influenced the international conservation movement accessible and of great interest to students and the general public it includes conservation trends in europe the usa india iran and japan

North American Forest and Conservation History 1977 annotation includes a survey of the country s natural and cultural landscapes essays by scholars of history geography and the social sciences move beyond the green movement to uncover enduring cultural patterns and social institutions this book is for students and professionals working in european history and the history of science and technology

Guardians of the Parks 1995 winner of the sierra club s 2021 rachel carson award one of chicago tribune s ten best books of 2021 named a top ten best science book of 2021 by booklist and smithsonian magazine at once thoughtful and thought provoking beloved beasts tells the story of the modern conservation movement through the lives and ideas of the people who built it making a crucial addition to the literature of our troubled time elizabeth kolbert author of the sixth extinction in the late nineteenth century humans came at long last to a devastating realization their rapidly industrializing and globalizing societies were driving scores of animal species to extinction in beloved beasts acclaimed science journalist michelle nijhuis traces the history of the movement to protect and conserve other forms of life from early battles to save charismatic species such as the american bison and bald eagle to today s global effort to defend life on a larger scale nijhuis s spirited and engaging account documents the changes of heart that changed history dan cryer boston globe with urgency passion and wit michael berry christian science monitor she describes the vital role of scientists and activists such as aldo leopold and rachel carson reveals the origins of vital organizations like the audubon society and the world wildlife fund explores current efforts to protect species

such as the whooping crane and the black rhinoceros and confronts the darker side of modern conservation long shadowed by racism and colonialism as the destruction of other species continues and the effects of climate change wreak havoc on our world beloved beasts charts the ways conservation is becoming a movement for the protection of all species including our own

American Environmentalism 1990 this book focuses on the diverse impact of forest history in general and of forest continuity fragmentation and past management in particular on the diversity and distribution of species the implications for the conservation of biodiversity in forests are also addressed chapters have been developed from papers presented at a conference held in leuven in january 2003 the emphasis is on temperate forests in europe and north america but the information may also be applicable to other regions or biomes the book will be of significant interest to researchers working within the areas of forestry ecology conservation and environmental history

North American Forest and Conservation History 1977 this study provides the first comprehensive discussion of conservation in nazi germany looking at germany in an international context it analyses the roots of conservation in the late 19th century the gradual adaptation of racist and nationalist thinking among conservationists in the 1920s and their indifference to the weimar republic it describes how the german conservation movement came to cooperate with the nazi regime and discusses the ideological and institutional lines between the conservation movement and the nazis uekoetter further examines how the conservation movement struggled to do away with a troublesome past after world war ii making the environmentalists one of the last groups in german society to face up to its nazi burden it is a story of ideological convergence of tactical alliances of careerism of implication in crimes against humanity and of deceit and denial after 1945 it is also a story that offers valuable lessons for today s environmental movement

History of Architectural Conservation 2007-06-07 the first comprehensive collection of texts on the conservation of art and architecture to be published in the english language the book consists of forty six texts some never before in english and many originally published only in obscure or foreign journals the thirty major art historians and scholars represented raise

questions such as when to restore what to preserve and how to maintain aesthetic character excerpts have been selected from the following books and essays john ruskin the seven lamps of architecture bernard berenson aesthetics and history in the visual arts clive bell the aesthetic hypothesis cesare brandi theory of restoration kenneth clark looking at pictures erwin panofsky the history of art as a humanistic discipline e h gombrich art and illusion marie cl berducou the conservation of archaeology and paul philippot restoration from the perspective of the social sciences the fully illustrated book also contains an annotated bibliography and an index

Germany's Nature 2005 an overview of contemporary environmental affairs from 1940s to the present with an emphasis on nature in an urbanized society land developments environmental technology the structure of environmental politics environmental opposition and the results of environmental policy

Encyclopedia of American Forest and Conservation History 1983 winner of the 2016 antoinette forrester downing award presented by the society of architectural historians in many cities across the world particularly in europe old buildings form a prominent part of the built environment and we often take it for granted that their contribution is intrinsically positive how has that widely shared belief come about and is its continued general acceptance inevitable certainly ancient structures have long been treated with care and reverence in many societies including classical rome and greece but only in modern europe and america in the last two centuries has this care been elaborated and energised into a forceful dynamic ideology a conservation movement infused with a sense of historical destiny and loss that paradoxically shared many of the characteristics of enlightenment modernity the close inter relationship between conservation and modern civilisation was most dramatically heightened in periods of war or social upheaval beginning with the french revolution and rising to a tragic climax in the 20th century age of totalitarian extremism more recently the troubled relationship of heritage and global commercialism has become dominant miles glendinning s new book authoritatively presents for the first time the entire history of this architectural conservation movement and traces its dramatic fluctuations in ideas and popularity ending by questioning whether its

recent international ascendancy can last indefinitely

Beloved Beasts: Fighting for Life in an Age of Extinction 2021-03-09 this book covers the physical care of botanical and zoological collections for scientific teaching and display purposes with emphasis on preservation for scientific value a manual for curators and collections managers containing practical guidance recommendations and advice across the whole field of natural history curation excluding palaeontology a wide range of international experts with hands on experience of collections have been chosen to contribute chapters on the care and conservation of both dried and fluid preserved collections of plant material vertebrates and invertebrates the emphasis is on remedial conservation ie the employment of best practice to prevent or arrest the long term deterioration of specimens to preserve their scientific and cultural worth special chapters will cover the fields of genetic material pest control the museum environment policies and procedures with appendices on such topics as documentation and disaster planning practical manual containing guidance recommendations and advice for natural history curation and conservation clearly presented well illustrated including colour photographs and extensive references multi contributor work by the best in their respective fields

Forest Biodiversity 2004 mexican conservationists have sometimes observed that it is difficult to find a country less interested in the conservation of its natural resources than is mexico yet despite a long history dedicated to the pursuit of development regardless of its environmental consequences mexico has an equally long though much less developed and appreciated tradition of environmental conservation lane simonian here offers the first panoramic history of conservation in mexico from pre contact times to the current mexican environmental movement he explores the origins of conservation and environmental concerns in mexico the philosophies and endeavors of mexican conservationists and the enactment of important conservation laws and programs this heretofore untold story drawn from interviews with leading mexican conservationists as well as archival research will be important reading throughout the international community of activists researchers and concerned citizens interested in the intertwined issues of conservation and development

The Green and the Brown 2006-08-14 the word conservation when used in the context of the preservation of built heritage implies an intrinsically complex concept that evolved over time

since it has been influenced by the perception of history throughout time this volume emphasises why an understanding of the cultural evolution of the conservation approach must be considered a prerequisite for architects and engineers if they are to cooperate in full harmony with historic artistic culture for the preservation of global built heritage in particular the volume highlights how during the second half of the last century the preservation process also involved engineering the science of making practical applications of knowledge which for a long time made an uncritical use of techniques and materials and devised interventions on historical heritage that were heavily invasive the volume also devotes special attention to the problems related to seismic risk to which italy greece and portugal are particularly prone problems that emerge during the crisis and reconstruction phases are dealt with in detail as is scheduled maintenance as this latter approach always constitutes an improvement in the performance of the monument and is the most appropriate tool for the conservation of the built heritage finally the volume collects examples of building restoration with case studies of many outstanding monuments the work will appeal to professionals and academics in the broader fields of civil engineering both geotechnical and structural engineering architecture art history the history of architecture restoration and cultural heritage management this book will provide a critical reading of the history of conservation discuss materials and techniques of ancient architecture cover seismic vulnerability and preservation of the historic integrity of the monument advocate an approach based on programmed maintenance feature numerous case histories including st mark s basilica in venice and the complex restoration of the cathedral of notre dame in paris

Historical and Philosophical Issues in the Conservation of Cultural Heritage 1996-09-26 at times controversial and uncompromising always intellectually honest alessandro conti s book is astonishingly the only attempt to comprehensively chart in time the changing impact of man s desire to preserve for future generations the materials meaning and appearances of works of art remarkable in its meticulous research of source material and breadth of scope history of the restoration and conservation of works of arts translated by helen glanville charts the practices and underlying philosophies of conservation and restored works of art from the middle ages to the end of the nineteenth century in english speaking countries a lack of
 2017-04-10 13/18 american environmentalism readings in conservation history

foreign language skills leaves many unable to consult a wealth of both published and unpublished historical documentation developments in conservation have therefore tended toward the scientific and analytical access to such documentation leads to better understanding of the present appearance of works of art and of their changing aspect and perception over time recent publications indicate that there is a great need for people writing on the subject to be aware of material which is not in their mother tongue approaches presented as new are in fact merely contemporary and have been discussed or practiced in other centuries and countries just as knowledge of practices and effects of art conservation and restoration should form an integral part of history of art degrees the more theoretic abstract and historical aspects should also be part of the training this book is an invaluable source for academic and public institutions art historians as well as practicing conservators and lovers of art

A Documentary History of Conservation in America 1972 this is the first and only reference volume covering the subject of windows in depth no other book offers this wealth of practical detail it is highly accessible written for both the professional and interested layperson written by a team of 15 experts surveyors structural engineers craftsmen and conservators describing their own approaches to specific materials problems and designs it includes over 400 illustrations in colour and black and white from a wide range of sources including historic drawings paintings pattern books textbooks manufacturers catalogues and contemporary and archive photographs it is an invaluable asset for everyone involved with windows on a daily basis combining the knowledge of leading historians and experts in the field of window conservation the window is a familiar yet surprisingly complex feature with a rich history that has not up until now been explored in any great depth this encyclopaedic work is both a fascinating exploration of the history and development of the window and a practical hands on guide to their care and preservation part 1 covers the history of the window including the development in glass technology it also provides an illustrated glossary of window types part 2 reviews the changes in policy and legislation and discusses structural issues decay mechanisms and the current stringent performance standards and how they affect historic windows part 3 focuses on the materials used in the construction of windows and the craft of
